REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee and Citizens of the Town of Leyden:—

The Report herewith submitted covers the fiscal year 1934 and is the tenth report of the present superintendent.

During the present year the number of schools has been reduced to three. The East School was closed because of the decrease in the number of pupils and the school transferred to and united with the Beaver Meadow School. The number of pupils in each school is about the same and both pupils and teachers are encouraged by a reasonable number of pupils in each grade. The outlook for larger numbers is not very promising and a further consolidation will undoubtedly be necessary in the near future. Everyone must regret the closing of these schools and the deserted appearance of the closed buildings, but the lack of pupils enough to warrant their continuance is certain and we must meet conditions as they are, not as we would like to have them. Transportation of the pupils from the West and East parts of the town has been in good hands and the pupils have been given every care.

A bus has been used in the transportation of the High School pupils. Mr. Austin Dobias has given excellent service with a bus of modern type and he has had two of the hardest type of winters to contend with in his work. He has worked hard to meet the exacting requirements of this type of work and has done everything he could be expected to do.

Reimbursements:—The State assumes a large part of the cost of maintenance of the schools. These come largely from the income tax, part of which is payable in March and the balance in November of each year. In addition there are the reimbursements for High School Tuition and High School Transportation and also of three-fifths of the salary of the Superintendent. In all, this amounts to about ninety per cent. of the total cost of the schools. The last legislature passed a bill making it mandatory on all towns to expend from local taxation at least \$5.00 on each \$1,000. of the valuation of the town according to the State Dept. of Taxation. The valuation of Leyden, as thus determined, is \$304,836.00 and the minimum sum to be expended from local taxation would be \$1,524.18.

Our net expenditure is much below this. The amount retained by the State is about two-thirds of the High School Transportation which amounts to a deduction from our refunds of about \$1,600.00. This seems an unreasonable amount, but reason

and politics have little in common. How to raise our net expenditures to the required amount is rather difficult in view of the small number of pupils we have. We shall try to devise some plan to meet this requirement.

Teachers:—At the close of the Summer Term, Miss Dwyer resigned her position as teacher of the South School and was married during the summer. Miss Dwyer was a strong, vigorous and devoted teacher whom we were sorry to lose. Our best wishes follow her to her new place in life. Her position was filled by the election of Miss Alyce B. Thresher of Hardwick, a graduate of the four-year course at Worcester Teachers' College. She has filled the place to our satisfaction. We now have three teachers, the equal of those in any town, anywhere and the work done in our schools may be duplicated but can not be excelled in this part of the State.

Textbooks:—The rapid progress of the world has made our textbooks out-of-date and the Committee are at work selecting more modern sets of books for introduction as soon as possible. The expense for our small enrollment will be very little and this will help to place our expenditures above the limit mentioned above. Supplies have been purchased as needed.

Health:—We have had no epidemics and the general health of the pupils is very good. We have lost our nurse and doctor but others will be secured soon and the oversight required will be given.

In General:—The buildings are in good condition. The Beaver Meadow building has been painted inside and the furnace repaired. Coats of paint inside and out would improve the looks of the other buildings and a water supply from some good source would be a great asset.

STATISTICS

School Census; October 1, 1934

Number of persons in town, five to seven years of age	8
Number of persons in town, seven to 14 years of age	35
Number of persons in town, 14 to 16 years of age	18
	—61

Registration of Pupils, Fall, 1934

Grade	1	2	3	4	5	6	7	8	Total
South School	1	2	4	1	2	2	0	2	14
Center School	2	0	2	3	1	2	4	0	14
Beaver Meadow	2	1	1	0	0	5	2	1	12
									—40

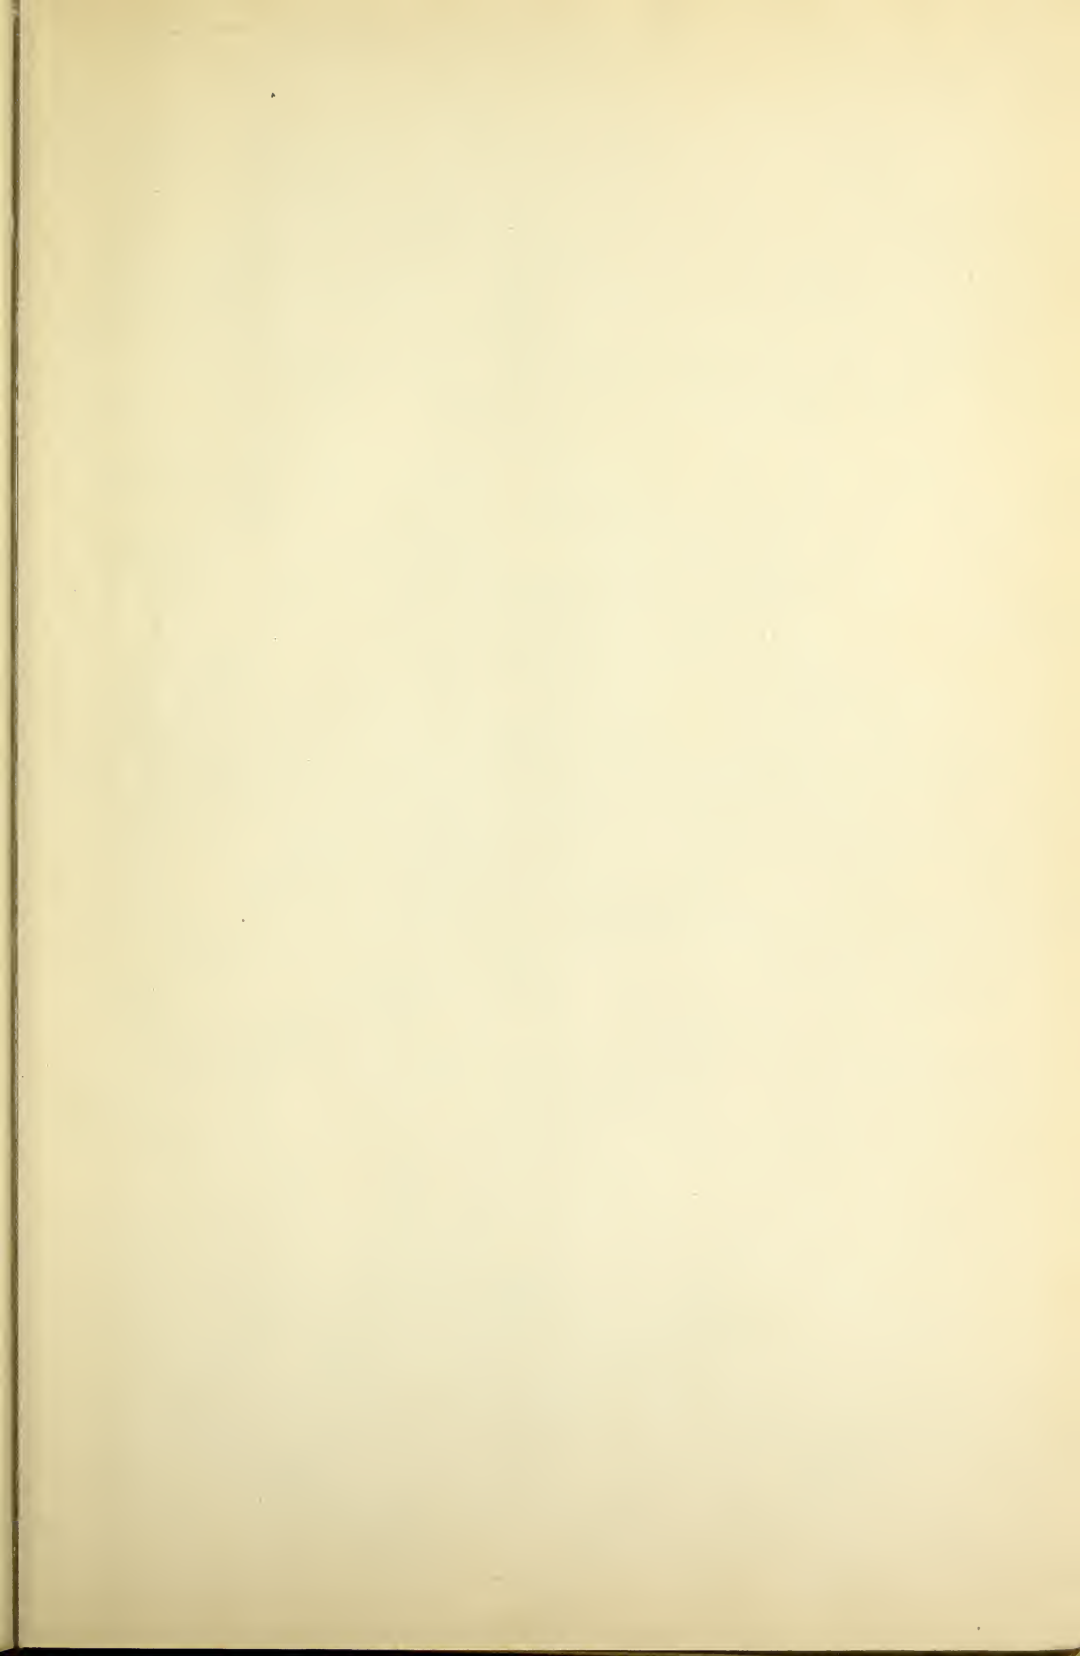

High School:	
Greenfield	15
Powers Institute	5
Northfield	1
Arms Academy	4
	—25

Total Number of All Pupils, Grade and High Schools 65

The above total represents a decrease in numbers from a year ago and unless some unforeseen thing takes place this decrease will be continuous for some years. This condition is uniform with conditions all over the country. We will take the best care of all entrusted to us and give them the best there is for them.

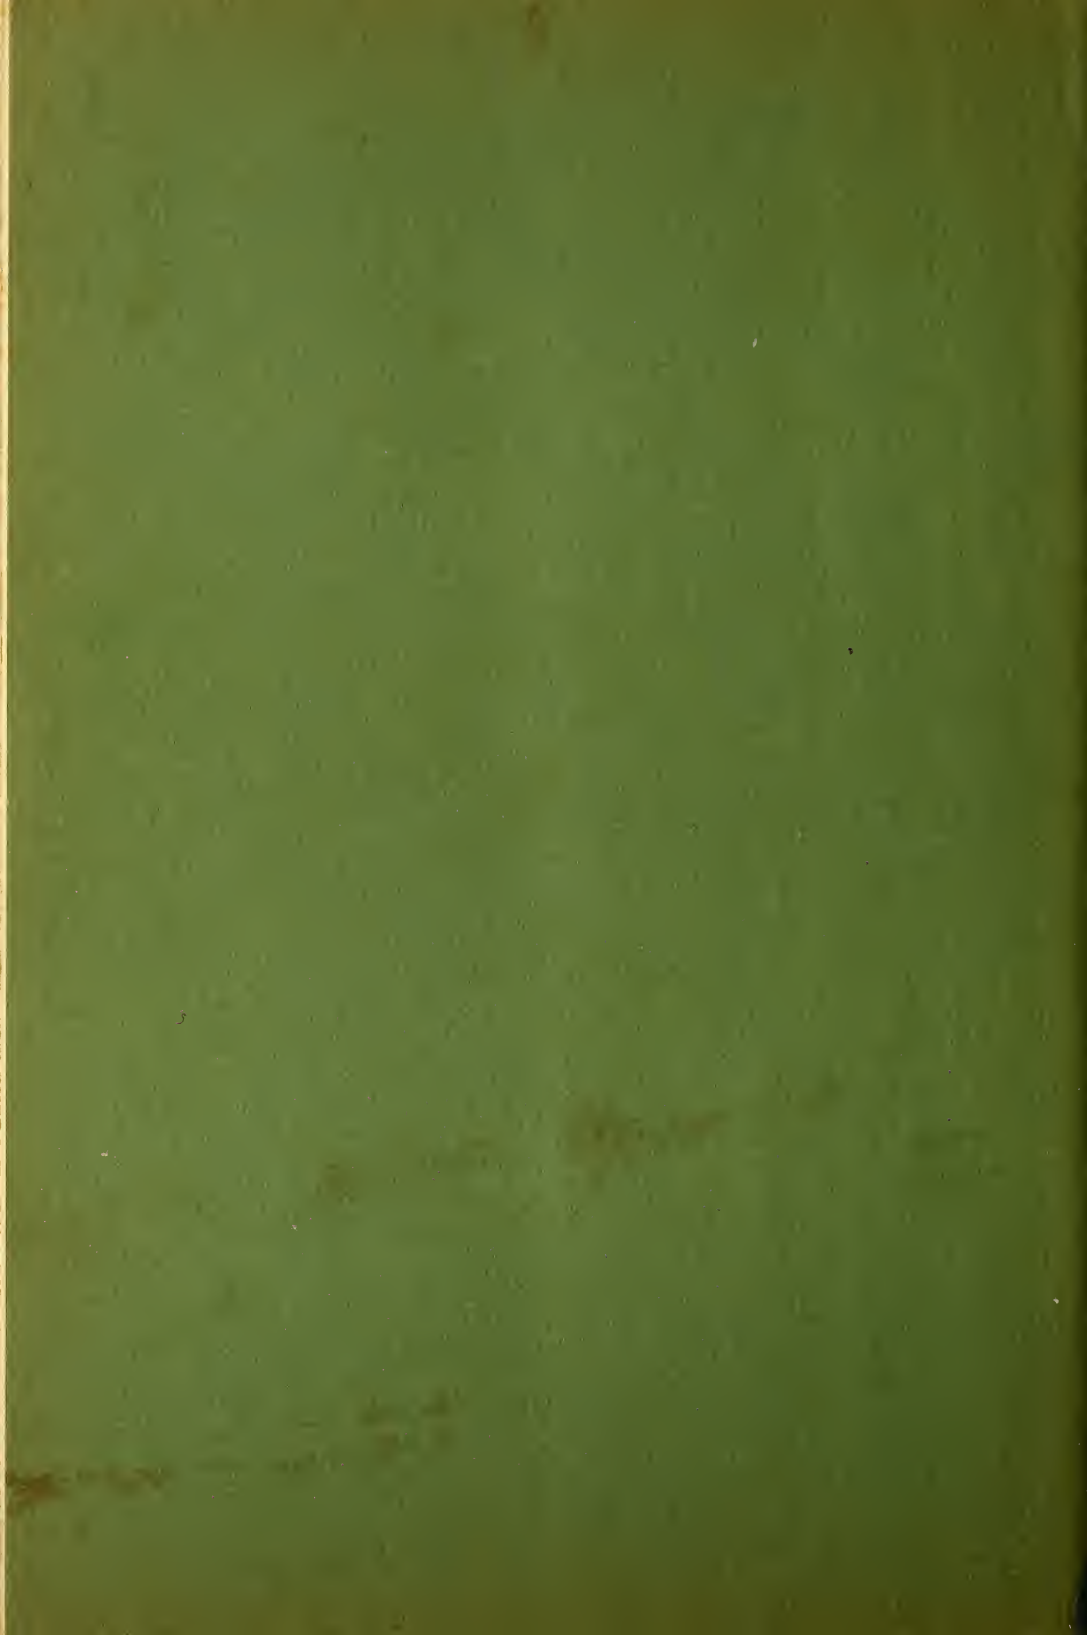

Respectfully submitted,

L. W. ROBBINS,
Supt. of Schools.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee and Citizens of the Town of Leyden:—

Submitted herewith is the Report of the Public Schools for the fiscal year 1935. This is the eleventh report of the present Superintendent.

During the present year we have maintained three schools as was done last year. The pupils from the East Hill and from the West have been carried to the Beaver Meadows and Center Schools. The pupils now form somewhat larger groups which gives mutual benefit to both groups without making the numbers too large. The transportation is in competent hands and has been well maintained under rather difficult conditions. Present arrangements should be continued until further consolidation becomes necessary.

Transportation to High School has been continued with Austin Dobias as the Conveyor. He has given the same excellent service as formerly.

We retain the same three teachers as last year. Their work is praiseworthy and above criticism. They should be supplied with every modern device and the best textbooks available. They make most excellent use of all we have given them. The pupils show definite and uniform progress and are showing creditable progress in High School.

New series of textbooks in Health and in English have been introduced, displacing older books, long out of date. The Health series provides instruction for Grades 5, 6, 7, and 8 with emphasis on Prevention rather than cure. The former English texts were seriously defective in several particulars and while competent and experienced teachers were able to provide supplementary work to meet these weaknesses, the Committee felt that better organized textbooks were necessary.

New series of arithmetics are now needed and should be introduced this year; later, another series of Geographies will modernize our instruction in the essential elements.

Necessary repairs have been done on and around the buildings so that they are in good condition. The number of pupils is growing smaller each year and this should give the people real concern.

STATISTICS

School Census; October 1, 1935

Number of persons in town, 5 to 7 years of age	7
Number of persons in town, 7 to 14 years of age	30
Number of persons in town, 14 to 16 years of age	11

Boys	0	2	0	0	0	1	3	1	7	
Girls	1	1	0	1	0	0	1	0	4	11
										—36
High School										
Greenfield High School									13	
Powers Institute									2	15
										—
Total pupils in all schools										51

There have been no epidemics of disease during the past year, the general health of the pupils is excellent. This is in strong contrast to conditions a few years ago, when illness and death from diseases such as diphtheria, scarlet fever and similar epidemics, were of yearly occurrence. While there are fewer children than formerly, they are better cared for, stronger and with a healthy future before them. Trained instruction makes for mental health, so our boys and girls are well cared for, on all sides.

Respectfully submitted,

LINVILLE W. ROBBINS,

Supt. of Schools.

STATE AUDITOR'S REPORT

Mr. Theodore N. Waddell,
Director of Accounts,
Department of Corporations and Taxation,
State House, Boston.

Sir:

In accordance with your instructions, I have made an audit of the books and accounts of the town of Leyden for the period from September 2, 1932, the date of the previous audit, to September 17, 1935, and submit the following report thereon:

The financial transactions as recorded on the books of the several departments receiving or disbursing money for the town were examined and verified.

The surety bonds of the treasurer, tax collector, and town clerk were examined and found to be in proper form.

General ledger accounts were compiled from information obtained as a result of the audit of the accounts of the several departments, and a balance sheet, which is appended to this report, was prepared showing the financial condition of the town on September 17, 1935.

The balance sheet indicates that the town is in very good financial condition.

The computation of the tax rates by the assessors for the years covered by the audit was checked and verified. Provision should be made by the assessors in 1936 for the 1931 overlay deficit amounting to \$98.35 and for the old age assistance tax abatements of \$12.

The books and accounts of the town treasurer were examined and checked in detail. The recorded receipts were compared with the records in the departments collecting money for the town and with the other sources from which money was paid into the town treasury, while the payments were verified by a comparison with the orders of the selectmen. The cash book additions were verified and the cash balance on September 17, 1935, was proved by actual count of the cash on hand and by a reconciliation of the bank account with a statement received from the bank.

The savings bank books, representing the investment of the several trust funds, were listed and verified by personal inspection.

The tax title deeds in the custody of the town treasurer were listed and reconciled with the books of the treasurer and the tax collector.

The accounts of the tax collector were examined and checked. The taxes outstanding at the time of the previous

examination were audited and all subsequent commitment lists were added and reconciled with the warrants of the assessors. The recorded collections were checked and compared with the payments to the treasurer, the abatements were verified by a comparison with the assessor's records of abatements granted, and the outstanding accounts were listed and proved. The outstanding accounts were further proved by mailing notices to a number of persons whose names appeared on the books as owing money to the town, the replies received thereto indicating that the outstanding accounts, as listed, are correct.

The financial accounts of the town clerk were examined and checked. The receipts for dog and sporting licenses were verified by a comparison with the record of licenses granted, and the payments to the county and town treasurers and to the Division of Fisheries and Game were verified.

The accounts of the sealer of weights and measures were examined. The recorded receipts were compared with the record of work done, and the payments to the treasurer and the cash on hand were verified.

The librarian's record of fines collected was checked and the payments to the treasurer and the cash on hand were verified.

Appended to this report, in addition to the balance sheet, are tables showing a reconciliation of the treasurer's cash, summaries of the tax and departmental accounts, as well as tables showing the trust fund transactions.

For the cooperation extended by all town officials during the progress of the audit, I wish, on behalf of my assistant and myself, to express appreciation.

Respectfully submitted,

HERMAN B. DINE,

Assistant Director of Accounts.

Report of the Superintendent of Schools

To the School Committee and Citizens of the Town of Leyden:—

Herewith is submitted the Report of the Public Schools for the Fiscal Year, 1936. It is the twelfth report of the present Superintendent.

The general policy of the schools is the same this year as last. Conveyance from the East and West parts of the Town to the schools in or near the Glen and to the High Schools in surrounding towns has been in the same hands as formerly. When we consider the difficulties which are always present we must have a high regard for the faithfulness and efficiency of both teachers and conveyors.

We retain the same three teachers. Their work is above criticism in all particulars and they deserve and should have every convenience and assistance in books and supplies they need. Their pupils make excellent records in all High Schools, attended by our graduates.

In addition to the usual repairs, a new furnace has been installed in the Beaver Meadow building. Several changes have been made in the method of heating the intake of air and the exit of foul air which will give better results and make a smaller fuel consumption necessary.

During the coming summer we should make extensive repairs at the Center School; The partitions in the woodshed should be rebuilt to allow the boys to pass to and from their closet without going out-of-doors, as they are obliged to do now. There is no cellar under the building and it is probable that one cannot be built because of the rocky formation near the surface. If this is so, a new heating and ventilating stove should be installed, similar to those in use in the one-room buildings in Bernardston.

This can be done by an appropriation of \$9,000.00 as last year, with no re-appropriation of the present unexpended balance.

To lower our present expenditures will result in a reduced re-imbursement by the State Educational Department. To prevent any reduction requires us to expend from local taxation a sum of at least \$1,700.00 and our margin above this sum is very small. We shall have no use for any part of the principal of the "Quintus Allen Fund" now in possession of the Town. This may be allowed to remain until a further consolidation of schools is necessary at which time this fund may be used to pay that expense. The annual income must be used to reduce local taxation.

Report of the School Physician for 1936

During October, 1936, the pupils of the three schools were each given a physical examination. Mrs. Fayette Whithed of Bernardston assisted as nurse. The pupils were each stripped to the waist and examined to detect any defect of the skin, scalp, nose, throat, teeth, glands, heart, lungs, spine, posture, or nutrition. The eyes and ears are checked by the teachers.

The general physical condition of the pupils in the schools has shown improvement over that when I last examined them in 1935. This time all the pupils had been vaccinated or had provided an exemption certificate as provided by law; and only nine cards indicating defects were sent home to parents.

Thirty pupils were examined and a total of eleven defects were found. Nine children were found to have teeth needing immediate attention. Two children had enlarged tonsils, but as they were not infected and there was no history of trouble with them, cards were not sent home. So, if all the teeth were repaired, Leyden would have a perfect health record!

Respectfully submitted,

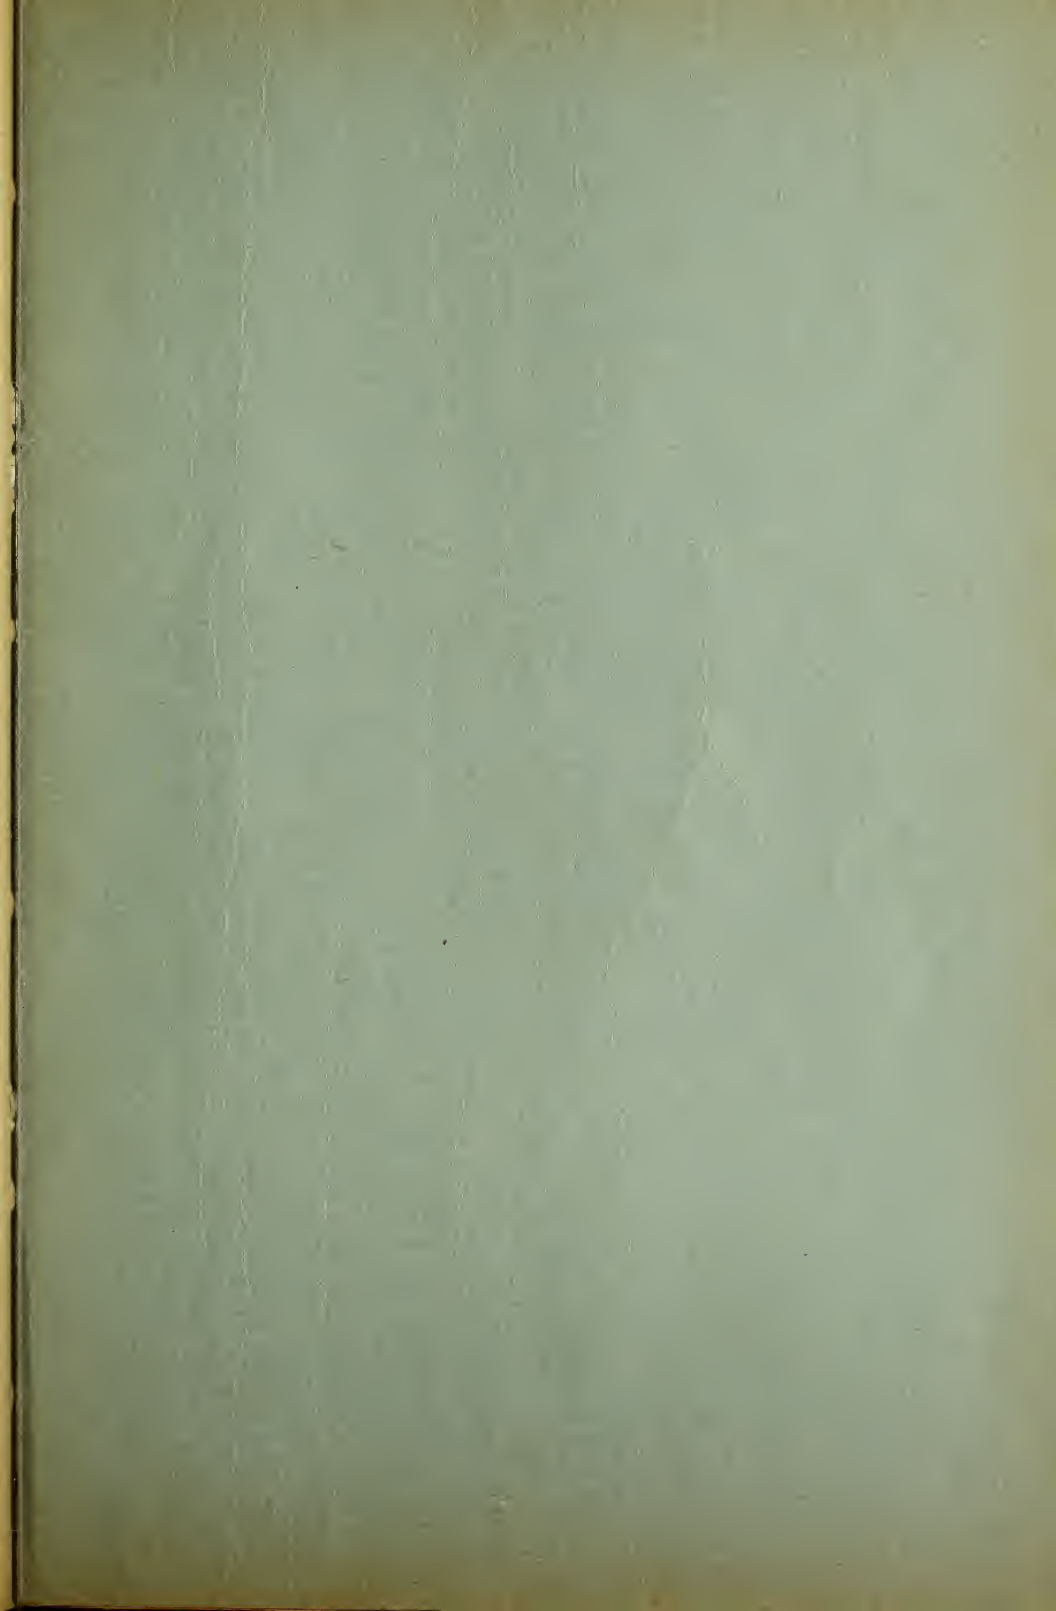

F. WILTON DEAN, M. D.

State Audit

THE COMMONWEALTH OF MASSACHUSETTS
DEPARTMENT OF CORPORATIONS AND TAXATION
Division of Accounts

State House, Boston, December 13, 1937

To the Board of Selectmen

Mr. Donald C. Herron, Chairman
Leyden, Massachusetts

Gentlemen:

I submit herewith my report of an audit of the accounts of the town of Leyden for the period from September 18, 1935 to November 13, 1937, made in accordance with the provisions of Chapter 44, General Laws. This is in the form of a report made to me by Mr. Herman B. Dine, Assistant Director of Accounts.

Very truly yours,

THEODORE N. WADDELL

Director of Accounts

TNW-MEF

Mr. Theodore N. Waddell
Director of Accounts
Department of Corporations and Taxation
State House, Boston

Sir:

As directed by you, I have made an audit of the books and accounts of the town of Leyden for the period from September 18, 1935, the date of the previous audit, to November 13, 1937, and submit the following report thereon.

The financial transactions, as recorded on the books of the several departments receiving or disbursing town funds or sending out bills for collection, were examined and checked in detail.

Ledger accounts were compiled, and a balance sheet, showing the financial condition of the town on November 13, 1937, was prepared and is appended to this report.

The balance sheet indicates that expenditures amounting to \$4,170.14 have been made for Chapter 81 and 90 highway work in excess of the amounts available on November 13, 1937. A temporary loan in anticipation of reimbursements due the town from the state and county could have been issued by the treasurer under Section 6A, Chapter 44, General Laws.

The computation of the tax rates by the assessors for the period covered by the audit was checked, and it was noted that the amount raised by taxation in 1936 was \$1,699 less than the requirements for that year, due to the fact that the sum of \$249 appropriated at a special town meeting held August 5, 1935, was not included in the total amount of appropriations raised in 1936 and also to the fact that the total amount of 1936 appropriations as used by the assessors in determining the rate was \$1,450 less than the total amount appropriated by the town in 1936. Again, the amount raised by taxation in 1937 was \$450 short of the amount required to be raised, apparently due to the failure to include in the list of 1937 appropriations used by the assessors in fixing the tax rate the amount of \$450 voted for a reserve fund under Article 13 of the warrant for the annual meeting of 1937.

Attention is called to Section 15A, Chapter 41, General Laws, which requires the town clerk, as soon as a vote appro-

appropriating money becomes effective, to certify to the assessors each appropriation in detail with the provision made for meeting the same; and also to Section 23, Chapter 59, General Laws, which required the assessors to assess taxes to an amount not less than the aggregate of all amounts appropriated since the last preceding annual tax assessment and which also provides that deductions on account of appropriations voted from available funds may be made by the assessors only with the written approval of the Commissioner of Corporations and Taxation.

The 1937 surety bonds of the town clerk, tax collector, and treasurer, for the faithful performance of their duties, were examined and found to be in proper form.

The books and accounts of the treasurer were examined and checked in detail. The receipts, as recorded, were compared with the records in the departments collecting money for the town and with the other sources from which money was paid into the town treasury. The payments were checked with the selectmen's orders, the cash book footings were verified, and the cash balance on November 13, 1937, was proved by actual count of the cash in the office and by a reconciliation of the bank balance with a statement received from the bank of deposit.

The payments of debt and interest were compared with the amounts falling due during the period covered by the audit and with the cancelled securities on file.

The books and accounts of the tax collector were examined and checked. The taxes outstanding at the time of the previous examination were audited, and all subsequent commitment lists of taxes were proved with the assessors' warrants. The collections as recorded were checked, the payments to the treasurer were verified, the recorded abatements were proved by a comparison with the assessors' records of abatements granted, and the outstanding accounts were listed and proved. The cash balance on November 13, 1937, was proved by actual count of the cash in the office.

Verification of the outstanding accounts was made by sending notices to a number of persons whose names appeared on the books as owing money to the town and from the replies received it appears that the outstanding accounts, as listed, are correct.

The receipts of the town clerk for dog and sporting licenses were checked with the records of licenses issued. The payments to the State and to the town treasurer were verified and the cash on hand was proved by actual count.

The recorded receipts of the sealer of weights and measures were checked with the records of fees charged and the payments to the treasurer were verified.

The records of accounts receivable in the public welfare and old age assistance departments were examined. The recorded collections were compared with the treasurer's record of receipts, and the outstanding accounts were listed and proved.

The librarian's record of fines collected was checked. The payments to the treasurer were verified and the cash on hand November 13, 1937, was proved by actual count.

The savings bank books representing the investment of the trust funds in the custody of the treasurer were examined and listed. The income was proved and the withdrawals were verified.

Appended to this report, in addition to the balancesheet, are tables showing a reconciliation of the treasurer's cash, summaries of the tax and departmental accounts, as well as tables showing the condition and transactions of the trust fund.

For the co-operation received from the several town officials while engaged in making the audit, I wish, on behalf of my assistants and for myself, to express appreciation.

Respectfully submitted,

HERMAN B. DINE

Assistant Director of Accounts

Report of the Superintendent of Schools

To the School Committee and Citizens of the Town of Leyden:—

Herewith is submitted the Report of the Public Schools for the fiscal year, 1937. This is the thirteenth report of the present Superintendent.

The schools have been carried on the required number of weeks and have met the scholastic requirements laid down by the State Educational Department. Our schools are the outgrowth of the schools established by the founders of the town nearly two centuries ago. Many things have been modified since that long ago time, but the fundamental requirement of "Education for Citizenship" for which the schools were established, is still the goal for which we strive. Reading, Writing and Arithmetic are the same now as then, but History and Geography are widely different.

Two of the teachers of last year are still with us and their work is of the highest type and has the approval of all both here and in the State Department. Much to our sorrow, Mrs. Bolton felt obliged to ask a year's leave of absence, which, of course, was granted. We hope she will be able to take up her work again in the near future. Miss M. Genevieve Green, a normal graduate of experience was secured and has maintained the school at an excellent scholastic standing.

Books and supplies have been provided as necessary and new sets of maps placed in each building. Three new desks were placed in Beaver Meadows School to meet the requirements for some beginners. May their number increase.

The repairs carried out at the Center School have resulted in better organization in several ways and the several schools are in about as good condition as possible to make them.

Transportation to the schools in town and to the several

High Schools has been carried on as in previous years. The arrangements have been satisfactory and should be continued. Our pupils in High School meet a changed condition after their life in our one-room school so that it takes some time for them to get into step with the larger organization of other schools. It is a condition that nearly all meet with credit.

To carry on the schools during the coming year will require the same appropriation as last year, but without any re-appropriation. We shall not need any part of the "Quintus Allen Fund" and it may be left to accumulate until needed.

The cordial support of the people of the town has been of material assistance in maintaining the standard of the schools for which we are grateful. This cordiality we bespeak for the coming year.

The reports of the Medical Examiner and Nurse are herewith submitted. They show a minimum of disease during the past year, thus ensuring a healthy growth toward strong manhood and womanhood.

Respectfully submitted,

LINVILLE W. ROBBINS

Superintendent of Schools

Report of the School Physician

During October 1937, the annual physical examination of the school children was conducted in each of the three schools. The new school nurse, Mrs. LeVitre of Gill, assisted. Thirty-two pupils were examined. One was absent.

Very few defects were found this year, an improvement over previous years. Three were found to have defective teeth, one had enlarged tonsils, and one poor posture. As Dr. Hall, the dentist, was making examinations of the teeth soon, minor defects were not reported by me. Other defects were reported to the parents in the usual manner.

Respectfully submitted,

F. WILTON DEAN, M. D.

School Physician

Report of the School Nurse

To the School Committee of Leyden, Mass.:—

I was appointed School Nurse in September, 1937. I have given approximately two days to school nursing since that time. The children were all weighed and measured.

Health pamphlets have been given out and taken up with the children.

Dr. Dean made his annual health examination, with which I assisted, during the month of October.

Dr. Hall, school dentist, made a dental inspection of all pupils and a Dental Clinic was held at the Town Hall, with which I assisted in the month of November. A large majority of children requiring work took part in this Clinic receiving Dental Certificates.

Respectfully submitted,

MAY B. LeVITRE, R. N.

Report of the Superintendent of Schools

To the School Committee and Citizens of the Town of Leyden:—

Herewith is submitted the Report of the Public Schools for the fiscal year, 1938. This is the fourteenth report of the present Superintendent.

The schools have been maintained the usual number of weeks and the supplies of books and materials have been ample. The teaching of History and Geography as two separate subjects is no longer acceptable as a true presentation of fact. The two subjects are but two parts of one phase of human existence. The recognition of this fact has brought out books which treat the subject as one unit. This is called "Social Science" and we are installing the books as funds become available.

At the close of the school year in June, Mrs. Glabach asked for a year's leave of absence and Miss Thresher resigned to take a position nearer her home. Both are teachers of the highest type of ability and their schools have been models of excellence. Miss D. Virginia Gould was elected to the Beaver Meadow School and Miss Elizabeth M. Clark to the South School. Both were normal graduates with two or three years' experience. Conditions in each school were satisfactory except with one boy in each school. These boys were the so-called "State Wards" and are difficult problems. The point is squarely before us:—Are we running our schools for the benefit of the children of the people of the Town of Leyden or must we regulate our methods and discipline to the level of these boys? Pupils of this type require the time and patience of the teacher, thereby preventing the normal children from getting the attention and instruction they should be given.

Mrs. Bolton returned to the Center School at the opening of the school year. Miss Green, who had held the school during Mrs. Bolton's leave of absence, is an efficient teacher and had maintained the school at its former level. We were glad to greet Mrs. Bolton and the school has been all we can ask.

Miss Clark, who took Miss Thresher's place at the South

School, declined to remain after the fall term and Mrs. Browning, a graduate of Powers Institute and North Adams Teachers' College, took over the school as a substitute. Her work is in line with her experience as a teacher elsewhere, and the utmost harmony prevails in the school.

Buildings and equipment are satisfactory and only the usual replacements will be required during the present year. Books and supplies will call for the same amount, because we do not expect either an increase or a decrease in numbers of pupils. The cost of the schools within the town can be estimated with practically accuracy, but the cost of transportation and tuition to High Schools are subject to conditions beyond our control. Reimbursement by the State Educational Department reduces the net cost to a relatively small sum, but the Town must pay these bills and then recover for money actually paid out. Tuition in any High School is just what the Town maintaining the High School says it shall be. Tuition at the Greenfield Vocational High School was increased \$25.00 per pupil and may be further increased as the cost of maintenance increases. Whatever it is, it is mandatory on us to pay it.

Transportation is in good hands, both within the town and to the High Schools in Greenfield and Bernardston. No accident or trouble has taken place, though travel has often been difficult.

The level heads of the School Committee have smoothed out possible troubles and forestalled others and to their efficient management the town is much indebted. It is usually more difficult to settle the problems arising in a small town than in the larger centers and the committee members have done their work in a highly satisfactory manner.

The Medical Examiner and Nurse have carried on their work well and the only outbreak of communicable disease was quickly brought under control. Outside of this one condition, the health of the pupils has been excellent.

Respectfully submitted,

LINVILLE W. ROBBINS

Superintendent of Schools

BESSIE I. BLACK, Auditor

Report of the School Physician

During November, the regular physical examinations of the school children were made. Mrs. Wendell Streeter of Bernardston, the newly selected school nurse, assisted me with the examinations.

A few more defects were found this year than last year. Dr. Hall, the Red Cross dentist, again examined and is repairing the children's teeth. A summary of the defects found follows:

Defective teeth	4
Enlarged and infected tonsils	11

Poor Posture	2
Skin disease	1
Overweight	3
Underweight	6

Respectfully submitted,

F. WILTON DEAN, M. D.

School Physician

Report of the School Nurse

Herewith I submit my report for the year 1938 for the Town of Leyden.

I became school nurse of Leyden in October 1938 and since that time have devoted part of my time to school nursing.

In November a few cases of scabies broke out in one of the schools; these cases were followed, however; and the victims returned to school as soon as the situation cleared up.

In December one day was spent assisting Dr. Dean in his annual physical examination of all students.

In December also, all students were weighed and measured and found to be in good health.

In November I assisted Dr. Hall in examining the teeth of every pupil in preparation for the Dental clinic which was held in January at the town hall. I am sorry to report that the attendance was very small.

Respectfully submitted,

DOROTHY M. STREETER, R. N.

Report of the Superintendent of Schools

To the School Committee and Citizens of the Town of Leyden:—

Herewith is submitted the Annual Report of the Public Schools of Leyden for the fiscal year, 1939. This is the fifteenth report of the present Superintendent and covers the work of the 168th year of the Public Schools of the Town.

Two of our teachers remained with us and their work is above criticism as always. Mrs. Bolton at the Center and Miss Gould at Beaver Meadows carried on their respective schools to our satisfaction, and we trust we shall have them with us next year. We are sorry to record a drop in registration. The Center and South Schools number about as usual but the Beaver Meadows School registers only seven this year against eleven last year. As we graduate one of the pupils of that school, the question of the continuance of that school is a subject for consideration by the School Committee and Town.

In the South School, Miss Edna Dodge was elected. Miss Dodge is a graduate of North Adams Teachers College with an excellent record for work and training. She has made an excellent teacher.

Books and supplies have been distributed as needed and the work of the schools has been as thorough as we have had in previous years. With a fixed population the amounts needed from year to year do not vary much and the amounts appropriated last year will be required this year.

The unfortunate accident to Mr. Dobias required a substitute driver of the bus to High Schools, but everything was well cared for and the trips were made without incident. The return of Mr. Dobias will take place in due time, we trust. Local transportation has been in the same hands this year as last.

The health of the pupils has been excellent and the Physician and Nurse have checked on all pupils as required by law. No epidemics have taken place in the schools and individual cases have been carefully treated to prevent any outbreak of communicable disease.

School Committee

Audited January 25, 1940.

BESSIE I. BLACK, Auditor

Report of the School Physician

The regular physical examinations of the school children were conducted in each of the schools during the latter part of September. Mrs. Dorothy Streeter, the school nurse, assisted at all examinations.

The health of the children seemed to have improved a little over the previous year. As has so often been the case before, defective teeth seemed to be the chief ailment. The number of major defects found this year is as follows:

Defective teeth	11
Enlarged and infected tonsils	2

Respectfully submitted,

F. WILTON DEAN, M. D.

School Physician

Report of the School Nurse

Herewith, I submit the Annual Report of the School Nurse for the fiscal year, 1939.

In January, Doctor Hall made a dental inspection of the pupils with which I assisted. A large majority of the children were found to have teeth which needed attention. Several of these children had the required work done.

The children were all weighed and measured twice during the year, in May and November.

This fall I assisted Doctor Dean with his annual examination of Leyden students and all cases then reported were investigated.

Several health pamphlets have been given out to the children at various times.

The general health of the pupils has been very good; few cases of disease are noted and with attention to the teeth, the pupils will be in excellent physical condition.

Respectfully submitted,

DOROTHY M. STREETER, R. N.,

School Nurse

Report of the Superintendent of Schools

The School Committee and Citizens of the Town of Leyden:—

Herewith I submit the Annual Report of the Public Schools of the Town of Leyden for the fiscal year, 1940. This is the sixteenth report of the present Superintendent and covers the work of the 169th year of the Public Schools of the Town of Leyden.

At the close of the school year in June, we lost two teachers. Miss Edna Dodge resigned to take a place in a Consolidated School in Monroe and Miss Dorothy V. Gould resigned to be married. They were excellent teachers who had done well in their schools.

Mrs. Glabach returned to her former school, Beaver Meadow, where we welcomed her after an enforced vacation of two years. Miss Anna Fisher, of Northfield, was elected to the South School. Mrs. Bolton retains her Center School. Organization and instruction are of a high grade of efficiency, and our pupils in the High Schools maintain excellent rank.

There are ample supplies and textbooks covering all the various needs of schools. The teachers are well trained in the proper use of all these materials and progress is according to the best modern usages.

The buildings are in good condition so that nominal repairs only will be needed. The introduction of gas-plates and tanks fills a long felt want by providing growing children with a hot meal at noon. School work is nerve-racking work and a hot lunch at noon will go far to supply the necessary strength to do the work and do it well. The greatest need now is a sufficient supply of fresh, pure water. There is an opportunity available to supply the Center School and the installation should be done this year. Miss Lilla Severance of Washington, D. C., who owns the land south of the road passing the Center School, has given us permission to connect the spring on her property with the building. It will be necessary to dig out the spring, place a cement box around it and lay a lead or copper pipe to the building. There are certain problems which will have to be solved, but other

towns, Warwick for instance, found no trouble in solving them. Warwick spent \$1,500.00 to provide their school with pure water and Leyden can do it for \$100.00 or less. How the other buildings may be provided with running water is not so easy.

A study of the land surrounding the buildings should reveal underground water which may be allowed to collect in a container and then piped to the building. As the opportunity to supply the Center School is now certain, the work should be done this summer.

The transportation of the pupils is in good hands and the service and results are very satisfactory. The present arrangement should be continued.

The health of the pupils has been excellent. One pupil who had been in a hospital for several years, returned to the Center School at the opening of the school in the Fall. Miss Rhodes was a good student who tried hard and was always orderly, quiet and kind. A recurrence of the disease forced her to return to the hospital where she died rather suddenly. In schools of such limited numbers, each pupil has a place and Miss Rhodes will be much missed. With this exception, the health of all the pupils has been excellent.

The reports of the Medical Examiner and the Nurse are herewith submitted. The Attendance Officer submits no report because, as in many years, there has been no need for his services. The Leyden children go to school because they want to and not because they have to.

In spite of few numbers and widely scattered houses, there is a civic pride felt by all the people of the town characteristic of some towns but absent in most. This civic unity is an attractive element in the life of the town as I have felt and seen it during the years I have been connected with the schools. It is an admirable condition and should be fostered as no doubt it will be.

Respectfully submitted,

LINVILLE W. ROBBINS,

Superintendent of Schools

Report of the School Physician

The regular physical examinations of the school children were conducted in each of the schools during October. Mrs. Dorothy Streeter, the school nurse assisted at all examinations. She likewise assisted at the three diphtheria toxoid clinics held at the town hall in April, May and June. At these clinics eight children were immunized against diphtheria. It is to be regretted that more parents did not bring their children for these free inoculations.

At the regular fall physical examinations, the health of the children was again found to have improved. Defective teeth were the only serious ailments found. The number of defects this year was as follows:

Defective teeth	9
Enlarged glands	1

Respectfully submitted,

F. WILTON DEAN, M. D.
